

**Alchemi Carbons Granular Activated Carbon product data sheet**

SN	NAME	ORIGIN	APPLICATION
1	Alchemi GR 4 X 12	Granular activated carbon	Specialized for Air purification, fine chemicals and water.
2	Alchemi GR 12 x20	Granular activated carbon	Specialized for Air purification, fine chemicals and water.
3	Alchemi GR 20 x40	Granular activated carbon	This product is specifically used for water purification, due to its high de chlorination and excellent adsorption capacity.
4	Alchemi GR 20 x50	Granular activated carbon	It is mainly used to adsorb taste, odor, color and toxic organic compounds from drinking water. Effectively removes most pesticides, herbicides, synthetic organic chemicals from drinking water.
5	Alchemi AX 1	Granular activated carbon	Specialized for purification of inorganic chemical and used where normal filter is restricted.
6	Alchemi GR 10	Granular activated carbon	Used widely in foods, chemicals and pharmaceuticals industries. Superior adsorption power and effective regeneration with alkali.
7	Alchemi GR 83	Granular activated carbon	Suitable for purification of water and industrial process liquids. Specialized for pesticides, detergents and compounds lead to taste and odour problem.
8	Alchemi MXM	Granular activated carbon	SPECILISED PRODUCT for oil refineries where it acts as catalyst support. It is also useful in hydrocarbon sweetening process.
9	Alchemi 12 X 40 MXM	Granular activated carbon	SPECILISED PRODUCT FOR removing impurities from foods, chemicals and pharmaceuticals and water due to its excellent adsorption properties.
10	Alchemi GR 7	Granular activated carbon	This product can be used for cleaning drinking water and processed water. filtration characteristics Surface area- 875 m <sup>2</sup> /gm (min

Office Address: Alchemicarbons,G-499,Sector:Alpha-2,Greater Noida, Gautam Buddha Nagar, U.P.- 201308

### Alchemi Carbons Pallet Activated Carbon product data sheet

SN	NAME	ORIGIN	APPLICATION
1	Alchemi EX	Palletized activated carbon	Excellent mechanical hardness that suits for solvent recovery application.
2	Alchemi AL	Palletized activated carbon	Highly active, medium density carbon providing excellent butane and gasoline working capacities.
3	Alchemi DM 2	Extruded activated carbon	This product is specifically used for water purification, due to its high de chlorination and excellent adsorption capacity.
4	Alchemi 3/4/5/6/8	Extruded activated carbon ( with 3 to 8 mm dia)	Specialized for Air purification, organic solvents, chemicals and gasoline vapor recovery.
